Bituminous Frictional Seal is a thin bond overlay with aggregate that increases skid resistance, reduces road slickness and protects the underlying pavement.

This project will cover 66.75 (2-lane) miles of selected roads and 10.6 miles of bike paths in the County.

“David Spears of Public Works reported that in 2012, the County paid \$1.33 per square yard compared with \$1.10 per square yard as quoted in this year’s bid.”
