Section 1

Introduction

Introduction

The enclosed calculations identify the total hourly cost of Sedgwick County COMCARE staff. Costs components include direct costs, departmental administration and supervision, as well as a proportionate share of County-Wide indirect costs.

The enclosed cost allocation plan identifies the total costs associated with each position. These costs are then divided by the number of available working hours to calculate an effective hourly cost.

MGT Consulting Group (MGT) prepared these documents at the request of the County. County personnel provided the expenditure and allocation data to MGT consultants. MGT consultants then prepared the Cost Allocation Plan utilizing a double step-down methodology.

Section 2

Reading A Cost Allocation Plan

Reading the Cost Allocation Plan

Overview

The Cost Allocation Plan is a document that distributes, or allocates, County and departmental indirect costs. Indirect costs are those costs incurred by County divisions and departments that benefit other divisions and departments within the County. Examples of indirect costs are accounting, purchasing, human resources and information technology.

The primary purpose for preparing the Cost Allocation Plan is to (1) identify the appropriate division and department indirect costs and (2) calculate corresponding rates.

The significant steps involved in preparing the Cost Allocation Plan include the following:

- Identify the County divisions and departments that provide support to other divisions and departments. These divisions and departments are referred to as central service or allocating departments.
- Identify the County divisions and departments that receive support from other divisions and departments. These departments are referred to as grantee or receiving departments.

- Accumulate the allowable actual expenditures of the County divisions and departments that provide support to other divisions and departments.
- Distribute, or allocate, the allowable expenditures of the County divisions and departments that provide support to other County divisions and departments based on available, meaningful, measurable and auditable allocation statistics that match the service provided to the service received.

Process

A double-step down allocation methodology is used to allocate the allowable costs of the central service divisions and departments. This methodology recognizes the cross support provided between central service divisions and departments. For example, accounting supports information technology by providing payroll, paying vouchers and preparing a budget. Information technology, however, also supports accounting by providing software and hardware and by maintaining and administering various applications and systems.

The double-step down methodology requires an initial sequencing of allocating divisions and departments. In the first step of the double-step methodology, allowable costs from central service divisions and departments are allocated in the sequence selected to all County divisions, departments and funds; including to other central service divisions and departments. The second step in the double-step down methodology is made to fully account for the cross support provided between central service divisions and departments. Central

service divisions and departments are closed after the second step in the double-step down allocation methodology.

Sections

Table of Contents

The first few pages of the Cost Allocation Plan are the Table of Contents. The column on the left side of the pages lists the central service, or allocating, divisions and departments. Each central service division and department is broken down into functions. Functions are the specific services provided by a particular division and department. The middle column lists the allocation base for each corresponding function. The column on the right side of the pages is the applicable page number.

Summary Schedule

The next few pages of the Cost Allocation Plan are the Summary Schedule. The Summary Schedule identifies the total dollar amount allocated from every allocating division and department to every receiving division and department. Allocating divisions and departments are listed down the left column and receiving divisions, departments and funds are listed across the top of each page.

Detail Schedules

The remaining pages of the Cost Allocation Plan are the details schedules for every central service division and department. The detail schedules for each central service division and department is structured in the following format.

Narrative. Lists the division and department name, provides a brief description of the activities performed, identifies the functions and the corresponding allocation base.

Departmental Costs (A). The actual expenditures for that division and department.

Incoming Costs (B). The support costs coming into the division and department from other allocating divisions and departments.

Total Allocated (C). The total amount allocated for that division and department. This amount is found at the end of the Incoming Costs schedule.

Function Allocations. The distribution, or allocation, of the Total Allocated costs by function.

Allocation Summary. The summary of allocated costs by function.
