I. [About this Document](#)

This document is a Request for Proposal. It differs from a Request for Bid or Quotation in that the county is seeking a solution, as described on the cover page and in the following Background Information section, not a bid or quotation meeting firm specifications for the lowest price. As such, the lowest price proposed will not guarantee an award recommendation. As defined in Charter Resolution No. 68, Competitive Sealed Proposals will be evaluated based upon criteria formulated around the most important features of the product(s) and/or service(s), of which quality, testing, references, service, availability or capability, may be overriding factors, and price may not be determinative in the issuance of a contract or award. The proposal evaluation criteria should be viewed as standards that measure how well a vendor's approach meets the desired requirements and needs of the County. Criteria that will be used and considered in evaluation for award are set forth in this document. The county will thoroughly review all proposals received. The county will also utilize its best judgment when determining whether to schedule a pre-proposal conference, before proposals are accepted, or meetings with vendors, after receipt of all proposals. A Purchase Order/Contract will be awarded to a qualified vendor submitting the best proposal. **Sedgwick County reserves the right to select, and subsequently recommend for award, the proposed service(s) and/or product(s) which best meets its required needs, quality levels and budget constraints.**

The nature of this work is for a public entity and will require the expenditure of public funds and/or use of public facilities, therefore the successful proposer will understand that portions (potentially all) of their proposal may become public record at any time after receipt of proposals. Proposal responses, purchase orders and final contracts are subject to public disclosure after award. All confidential or proprietary information should be clearly denoted in proposal responses and responders should understand this information will be considered prior to release, however no guarantee is made that information will be withheld from public view.

II. Background

Sedgwick County, located in south-central Kansas, is one of the most populous of Kansas' 105 counties with a population estimated at more than 508,000 persons. It is the sixteenth largest in area, with 1,008 square miles, and reportedly has the second highest per capita wealth among Kansas' counties. Organizationally, the county is a Commission/Manager entity, employs nearly 2,800 persons, and hosts or provides a full range of municipal services, e.g. – public safety, public works, criminal justice, recreation, entertainment, cultural, human/social, and education.

The camera and debriefing system would be used to remotely observe, record, and playback video of EMS System practitioners in the Sim Lab setting. This will allow for Sim Lab personnel to monitor in real time individual performance in simulated scenarios without physically being in the same room. Not being in the same room is an essential component for maintaining suspended disbelief, allowing Sim Lab personnel to evaluate behavior that is as close as possible to the actual behavior that occurs in the real world.

Recordings of these simulated scenarios will be reviewed for credentialing purposes and used for clinical system improvements. We also need the system to incorporate simulated patient data from our Gaumard manikins using the UNI software platform. This will allow for the Sim Lab employee running the system to monitor both simulated patient parameters and external video feed from the same screen. Also, integrated video and simulator data on the screen will allow for seamless review and debriefing with other personnel. The system also needs to not have a lag time, so that when unexpected situations occur in the Sim Lab, the technician who is running the scenario can make appropriate on the fly, real time changes to the human patient simulators.

III. Project Objectives

Sedgwick County, Kansas (hereinafter referred to as "county") is seeking a firm or firms to provide High Fidelity Sim Lab Debriefing Hardware and Software for EMSS. The following objectives have been identified for this contract:

1. Acquire High Fidelity SIM Lab Debriefing Hardware/Software Services meeting the parameters, conditions and mandatory requirements presented in the document.
2. Establish contract pricing with the vendor that has the best proven "track-record" in performance, service and customer satisfaction.
3. Acquire High Fidelity SIM Lab Debriefing Hardware/Software Services with the most advantageous overall cost to the County.

Should you elect to participate, submit one (1) original **AND** one (1) electronic copy (.PDF/Word supplied on a flash drive) of the entire document with any supplementary materials to:
