## FOR IMMEDIATE RELEASE

### **Sedgwick County Flood Damage Estimates In Excess of \$3 Million**

(Sedgwick County, Kansas) In the last week, Sedgwick County Emergency Management has been partnering with several Sedgwick County jurisdictions to document flood damage estimates. These estimates have come directly from units of local government and citizens who incurred damages. The damages to publicly owned property reported total more than \$3.3 million, with the majority coming from the City of Wichita (\$3,045,599). Two hundred eighty Wichita homes experienced flood damage without insurance.

This substantial damage should qualify Sedgwick County as a Presidential Disaster Declaration area. This declaration will bring federal assistance to the area for clean up purposes.
