RFP #15-0051

Architectural and Engineering Services

**Design and Construct Garage**

Addendum No. 2

Please review the additional information as discussed during the pre-proposal meeting of Friday May 1<sup>st</sup>.

1. Power should be provided in building plans.
2. The interior floor plan should be open and support of structure should be provided by other means.
3. Approximate measurements of ambulances to be stored are 9 feet wide by 26 feet long and allow for a 54 foot turn radius. There should be a minimum of 5 feet between parked ambulances.
4. Garage doors should be 12 feet wide by 12 feet tall and allow space between the garage door and ceiling for automatic openers to be mounted.
5. The minimum ceiling height of the building should be 16 feet.
6. The building must provide electric heat.
7. Interior finishes should be similar to the garage that was viewed at the pre-proposal meeting and include space for a workbench and space to hang items on the walls.
8. The approximate dimensions of the cots to be stored at the facility are 8 feet by 20 feet.
9. Each truck bay should have its own 20 amp circuit for drop power.
10. The building should provide a drive-thru style approach; there are no requirements as to which direction the facility should sit on the lot for best function.
11. The facility will require cipher style door locks on any entry doors to the building.
12. Construction funding for this project will not be available until 2016.
13. Lot size for this facility is 147.5 feet East/West by 125' North/South.
14. The design must meet the 2010 ADA Standards for Accessible Design.
