RFP #15-0075

Fabric Membrane Salt Storage Structure and Foundation

Addendum No. 2

Please note that the previously required MANDATORY meeting has been changed to NON-MANDATORY to provide for a wider vendor base to respond.

Please see additional clarification information below regarding this Request:

The county has not asked that engineering be included as part of the RFP response. This is a design-build project and there will be no separate bid for construction. Engineering of the structures is not required prior to award of the contract. Please see Section 17 of the RFP for details on the proposal content.

The county has not predetermined a building size. The proposer is to, "Design... a fabric membrane structure of appropriate size to house a minimum of 3,500 tons of salt and sand mixture stored in piles not to exceed 14 feet in height." The included Site Plan is a general location where the building and concrete ramp can be constructed. It is not intended to identify a specific building size.

Vendors are responsible for checking the website and **acknowledging any addenda on the Proposal Response Form.**
