END OF SECTION

I. Purpose

Sedgwick County, located in south-central Kansas, is one of the most populous of Kansas’ 105 counties with a population estimated at more than 508,000 persons. It is the sixteenth largest in area, with 1,008 square miles, and reportedly has the second highest per capita wealth among Kansas’ counties. Organizationally, the County is a Commission/Manager entity, employs nearly 2,800 persons, and hosts or provides a full range of municipal services, e.g. – public safety, public works, criminal justice, recreation, entertainment, cultural, human/social, and education.

Sedgwick County is seeking bids for On-Call Ballot Printing Services, these services may be requested to supplement the in-house printing of election ballots on an AS NEEDED BASIS.

II. Submittals

Carefully review this Request for Bid. It provides specific technical information necessary to aid participating firms in formulating a thorough response. Should you elect to participate, submit one (1) original **AND** one (1) electronic copy (PDF/Word supplied on a flash drive) of the entire document with any supplementary materials to:

Kimberly Evans
Sedgwick County Purchasing Department
525 N. Main, Suite 823
Wichita, KS 67203

SUBMITTALS are due **NO LATER THAN 1:45 p.m. CDT, TUESDAY, June 14, 2016**. Responses must be sealed and marked on the lower left-hand corner with the firm name and address, bid number, and bid due date. Late or incomplete responses will not be accepted and will not receive consideration for final award.

Bid responses will be acknowledged and read into record at bid opening which will occur at 2:00 p.m. CDT, on the due date.

III. Scope of Work

Primary August 2, 2016

General November 8, 2016

1. General Information

- 1. Extreme Importance: Printing of optical scan paper ballots for the MODEL 100/650 vote tabulation systems is an integral element in the overall integrity of the election process.
- 2. Accuracy: Because of the importance of elections, it is imperative that the ballot printing be accurate. The printer will be accountable for readability of the ballot by the tabulator and the voters.
- 3. Ballot Layout: The ballot styles (fronts and backs) will be generated by the software program (UNITY). For typesetting, the Election Office will provide ballot styles that are in a Portable Document Format (.PDF) on a flash drive for the typesetting system at the printer. The printer’s method of typesetting is directly related to their capabilities.
- 4. Quantity: The number of ballots printed for an election is based on anticipated voter turnout. Even year elections are countywide elections, and current voter registration in Sedgwick County, Kansas is approximate 280,000 eligible voters.

2. Printer’s Responsibilities

- 1. Printer Requirements:
 - a. Printer must guarantee that finished ballots will be read by the MODEL 100/650. To help ensure compliance, the Election Office will provide a test PDF file from which a test deck of ballots can be produced for testing on the MODEL 100/650.
 - b. Printer must provide proper printing equipment and presses.

- c. Printer must have appropriate and sufficient paper stock available.
 - d. Printer must provide a controlled environment and required printing conditions.
 - e. Printer must have enough staff to complete the project by the deadline.
 - f. The printer's computer software must be in-house, not subcontracted, and compatible with the UNITY election software. The election office will work with any interested bidder to produce a ballot to test compatibility.
2. Printer must have an understanding of the ballot printing process, which includes experience with substantial quantities of ballot formats and ballots, rotational sequences of candidates and stringent time frames required by Kansas Election Laws. Without this experience, the printer must have a clear understanding of the task at hand and be able to demonstrate their capabilities to the satisfaction of Sedgwick County.
 3. Printer must be able to document that they have previously provided services and supplies and time frames, which are reasonably equivalent to the services and supplies required by the printing specifications.
 4. The Election Office reserves the right to inspect printing facilities or to request information regarding printing equipment or operations. Printer must ensure the security of the ballots and the ballot files at all times.
 5. The model 100/650 ballot requires very accurate registration of voting positions, timing marks, diagnostic marks and front to back registration.
 6. Time Frame: Due to statutory restrictions, it is imperative that ballots must be completed in a timely manner. Completed ballots must be delivered to the Election Office within fourteen (14) calendar days from the date the ballot transfer is given to the printer for the even year August Primary and November General Elections.
 7. Printer may be required to satisfactorily produce a Mock Election Ballot according to these bid specifications, charged at the prices quoted in their bid prior to being awarded the bid by Sedgwick County. If these ballots do not meet the approval of the Election Office, their bid will be rejected and the next lowest and best bidder will be notified.

3. Bid Sheet Definitions

1. Charge Per Ballot Style: For purposes of this bid, this includes any cost related to the following:
 - a. Ballot Style: Each different type of ballot face, including the fronts and backs.
 - b. Transfer Method: The PDF ballot information will be transmitted by flash drive.
 - c. Proofs:
 - i. Proofs must be provided to the Election Office from the actual image.
 - ii. Proofs and corrected proofs must be provided to the Election Office for each ballot style. Facsimiles (FAX) of proofs are not acceptable.
 - iii. Proofs will be provided to the Election Office in groups of no more than 200 proofs per day. Upon receipt of each group, the Election Office will then have 24 hours to notify the printer of acceptance or rejection.
 - iv. Upon notice of approval of proofs, the printer may begin printing the test deck ballots for those approved proofs.
 - v. The Election Office will work with those printing companies, which use a digital printing/proofing system. However, the accurate readability of all ballots by the tabulators and by the voters is the responsibility of the printing company.
 - d. Ballot Test Deck
 - i. Test deck ballots will include a sufficient quantity of each ballot style to allow for testing of a blank ballot, an over-voted ballot and a minimum of 5 additional ballots per ballot style to be marked for testing of regularly voted ballots.
 - ii. Printer will produce the test deck ballots in the same manner, on the same equipment, and using the same stock and ink to be used to print all production ballots.
 - iii. Test deck ballots will be scored in the same manner as production ballots, and shrink-wrapped in groups of 100. No slip sheets are necessary for the test deck. Packages of test deck ballots should have a label or sticker on the wrapper or a small piece of paper

inserted with the word “Test Deck” on it. Upon receipt of the test deck ballots, the Election Office will then have 72 hours to notify the printer of acceptance or rejection. Upon notice of approval of the test deck ballots, the printer may begin printing production ballots.

- e. **Printing:**
 - i. Printer will automate setup by using a PDF medium to produce proofs and finished goods.
 - ii. The printing of the ballots should be on an offset press.
 - iii. It may be desirable in some instances to print several ballot styles side-by-side on the press. The most common printing of ballots is on a one-up press due to the small quantity of ballots per style.
 - iv. The actual printing and cutting of ballots requires the use of ballot templates. The templates provide accurate placement of machine-readable codes and ovals where the voters mark to cast their vote. The templates must be used as an overlay to check the alignment of voting positions (ovals), timing marks, diagnostic marks and trim lines.
 - v. The voting positions, timing marks and diagnostic marks are built into a 1/4” by 1/4” grid. Maintaining the accuracy of this grid from top to bottom and from side to side on both sides of the ballot is mandatory.
- f. **Type of Ink:**
 - i. The ink used in printing text and other pre-printed marks on the ballot card must be a black non-reflective ink and not water based.
 - ii. All black printing must be solid, dense and must not have voids or breakthrough with the exception of the voting position ovals. The ovals must be of hairline weight so as to not be detectable by the unit.
- g. **Ballot Scoring:**
 - i. A letterpress or perforating/scoring machine may be used to score the ballots.
 - ii. The ballot templates for each size of ballot indicate the scoring marks. It is critical that the scores do not go through a voting position oval or timing mark. Use of the templates will ensure this condition does not exist.
 - iii. All ballot styles will need to be scored.
- h. **Trimming:**
 - i. Trim of the ballots is critical. The following tolerances are suggested to ensure accuracy of tabulation:

Band Width	8.5 in. (+.027, -.02)
Ballot Length	11, 14, 17, 19 in. (+/- 0.03)

Ballot length is important, but ballot width is critical. The ballot templates include trim lines that are printed on the ballot for trim accuracy. After final trim, a portion of the trim lines must be visible to ensure an accurate trim.

- ii. The stock must be squared before printing. The final trim should be cut in lifts of less than 1/2”. A gutter must be left between ballots for precise final back trims for the sides.
- i. Each ballot style must be tested through the Model 100/650 tabulators by the printer, in regular tabulation mode for blank, over-voted and correctly marked ballots prior to printing of production ballots. A test deck of ballots is to be provided for this purpose.

2. Charge For Paper: For purposes of this bid, this includes the following:

- a. **Paper Stock:**
 - i. Must be first quality, mill brand that is sold by a franchised distributor of Wausau or International Paper mills. Seconds from a converter are unacceptable.
 - ii. 80 lb. Index is the minimum required. 110 lb. Index is the maximum required.

- iii. The stock composition must be of chemical wood fiber.
- iv. The grain must be parallel to the length of the ballot (long grain).
- v. The maximum allowable curl of the stock measured from a flat surface is 0.05”.
- b. Paper Color: All ballots will be printed on white paper stock.
- c. Ballot Sizes: Finished sizes could be 8 ½ x 11 or 8 ½ x 14 or 8 ½ X 17 or 8 ½ X 19 inches.
- d. Packaging and Slip Sheets: Ballots will be shrink-wrapped in groups of 100 with a brightly colored slip sheet visible every 25 ballots. That is 3 slip-sheets per package of 100. The color of the slip-sheet must be pre-approved by the Election Office. Packages of scored ballots should have a label or sticker on the wrapper or a small piece of paper inserted with the word “Scored” on it.
- e. Delivery:
 - i. Proofs, corrected proofs, test deck ballots and production ballots will be delivered to the following address: Sedgwick County Election Office, 510 N. Main, #101, Wichita, KS 67203, Phone (316) 660-7100.
 - ii. Bids are to be given in a flat fee, which includes any freight charges for delivery to 510 N. Main, #101, Wichita, KS 67203. A loading dock is not available at this location. Deliveries requiring the movement of pallets will require a lift gate truck or ramp.
- f. Overruns:
 - i. All overrun ballots, if any, are to be delivered within 3 days of the actual ballots ordered, to the same address listed above. They do not need to be scored or shrink-wrapped in groups of 100 with a brightly colored slip-sheet visible every 25 ballots, but they must be trimmed correctly and boxed.
 - ii. If the Sedgwick County Election Office uses any of these ballots, they will notify the successful bidder and pay the price agreed to for additional orders on the Ballot Bid Sheet.
 - iii. Ten (10) days following the election, the successful bidder may request to inventory the overruns to ensure the accuracy of the billing.
If the successful bidder wishes to exercise this post-election inventory, they must first submit a comprehensive list of ballot overruns, which includes the number of each style, at the time the overruns are delivered.
- 3. Charge for Additional Ballot Order: If applicable, printer must note an additional fee over the cost of the paper and run change, when any additional ballot orders are placed.
- 4. Bidder must quote all prices on the Bid Sheet (Attachment A) or the bid may be rejected.
- 5. The number of ballots ordered and the number of ballot styles needed varies with each election. Use the Ballot Information matrix to view the amount of the anticipated order for this year.
- 6. Complete and sign required bid materials and, including the Bid Response form and the pricing sheet.

IV. Sedgwick County’s Responsibility

- Provide information, as legally allowed, in possession of the County, which relates to the County’s requirements or which is relevant to this project.
- Designate a person to act as the County Contract Manager with respect to the work to be performed under this contract.
- Sedgwick County will work with any interested vendor to prepare a mock election ballot to ensure compatibility of computer systems.
- Accuracy Approval: Sedgwick County Election Office will have the final approval on the accuracy of the ballots. If the ballot trims do not show, the registrations or printing are off, or the diagnostic test on the MODEL 100/650 comes up with error messages due to an error on the part of the printer, that ballot style will be reprinted at the printer’s expense. All defective ballots must be immediately destroyed. Sedgwick County reserves the right to have a Sedgwick County Election Official or their designee present to witness their destruction. Final delivery must still be made within the fourteen (14) calendar day deadline for the even year August Primary and November General Elections.
- The production of ballots must conform to rigid specifications and time frames. If ballots do not meet the specifications to the satisfaction of Sedgwick County, the remaining purchase will be canceled with no cost to the County.

- Quantities shown on the Ballot Information Matrix (Attachment B) are estimates only and Sedgwick County reserves the right to increase or decrease the quantities.
- Sedgwick County intends to provide one single order for ballots listing the exact quantity of ballots needed for each style of ballot, for each election. However, changes in voter registration totals or special questions may require the printing of additional ballots. Therefore, the printer must indicate if there is any fee for an additional ballot order per 100.
- The Election Office will furnish quantities of ballots per style per precinct.
- Ballot Orders to be placed at any one time or of any one style will be an order minimum of 50.
- For the purpose of comparing the overall cost of printing the ballots, the election office will use the estimated quantities to compare the costs from different companies. However, the amount billed will be based on the winning bidders bid sheet as per the actual order.

V. **Bid Terms**

A. **Questions and Contact Information**

Any questions regarding this document must be submitted in writing to Kim Evans at Kimberly.j.evans@sedgwick.gov by 5:00 p.m. CDT June 9, 2016.
