No Bid	Garver, LLC	Kirkham Michael & Associates, Inc.	Wilson & Company, Inc., Engineers & Architects	

On the recommendation of Joe Thomas, on behalf of Public Works, Linda Kizzire moved to **accept the best proposal from TranSystems Corporation, negotiated not to exceed \$410,000.00.** Jennifer Dombaugh seconded the motion. The motion passed unanimously.

A committee comprised of Lynn Packer, Mark Borst and Jim Weber - Public Works, Chris Upchurch - Wichita Area Metropolitan Planning Organization (WAMPO) and Joe Thomas - Purchasing reviewed all submitted proposals as to cost, approach to project methodologies, experience and qualifications.

The committee shortlisted Iteris, Inc. and TranSystems Corporation for interviews and further review. The committee unanimously chose TranSystems Corporation as offering the best proposal for the ARC95 project. The project is to develop a corridor plan for a section of 95th Street South in the unincorporated county that includes a new crossing over the Arkansas River. The corridor is part of the alternative local road corridor identified in the 2008 South Area Transportation Study (SATS). It encompasses 95th Street South between Greenwich Road and Meridian Avenue.

The various disciplines involved in this project include project management, engineering, rail coordination, mapping, traffic analysis, public involvement, planning, land use, bridge engineering, hydrology and hydraulics, environmental and regulatory review and website development.
