**Recommend the proposal from Morgan Medical, LLC (Option 2) in the amount of \$15,215.00 for the ReVel ventilator.**

Transport ventilators are portable units for routine or emergency medical transport. The LTV 1200 is too confusing of an interface, with hidden menus and functions that make operations more difficult than the ReVel. The AHP300 is too heavy and the delivery system does not meet specification.

The ReVel ventilator is used by both local air ambulances in the region. Both services agree that the ReVel is a superior product. The air ambulance services have already been trained on the ReVel and are comfortable using the device.
