On the recommendation of Kristen McGovern, on behalf of Public Works, Jennifer Dombaugh moved to **accept the bid from Andale Construction, Inc. in the amount of \$1,234,645.34.** Linda Kizzire seconded the motion. The motion passed unanimously.

Super Seal is a cementitious material used to stabilize the subgrade for selected county roads.

Andale Construction, Inc. is currently the only vendor experienced in this process.

This application method for Super Seal has been in existence and practice worldwide for decades but has not been used in this area until recently. There is only one contractor in the local market who is equipped and experienced in this application method. Public Works continues to monitor the cost of this type of application against the cost of other methods and materials, that provide a similar end product to ensure that the county is getting the best possible value.

Question: How many miles of road does this cover? 3.69 miles.
