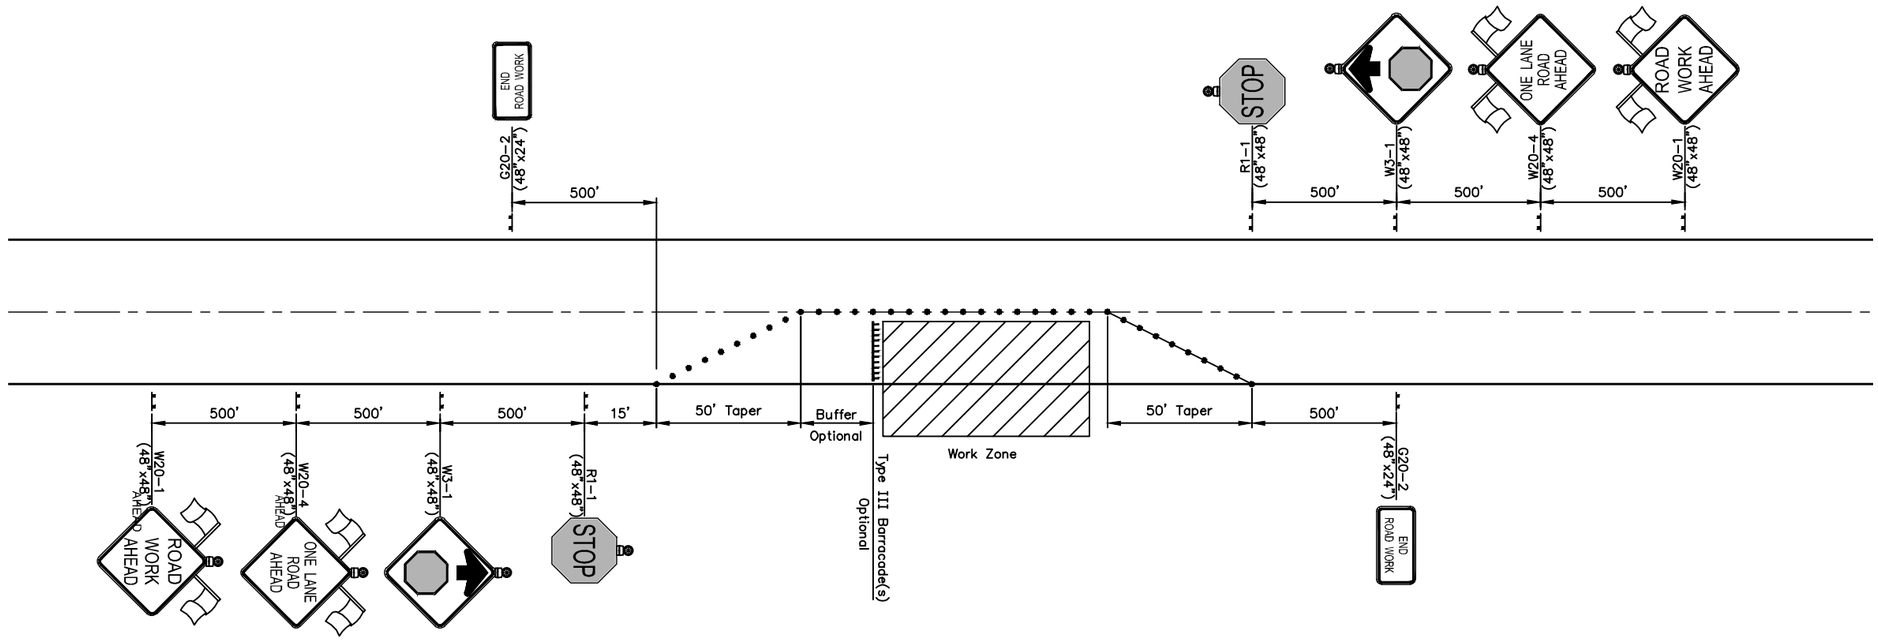
4" SOLID (Lin. Ft.)					
TEMPORARY STRIPING (Line Mile)					

See Sheet Nos. SheetNumber & SheetNumber for Traffic Control Notes.



LEGEND

- Channelization Device
- Temporary Sign Support w/Sign
- Type III Barricade(s)

NOTES:

All temporary sign supports shall meet all applicable crashworthiness criteria in NCHRP 350 or updated requirements.

Channelization devices shall be either drums or slim line channelizers.

The total length of the traffic control zone between stop signs shall be short enough that drivers from both directions can see approaching traffic beyond the work area. Total traffic control zone lengths in excess of 200' shall be approved in advance by the Engineer.

The traffic control zone, including all advance signing shall be removed at the end of each work day.

If work zone must be protected overnight due to cross sectional issues or equipment left on site, the Contractor shall submit a traffic control plan for review and approval by the Engineer for appropriate signing and other traffic control devices sufficient to provide the required protection. The devices necessary for this protection shall be subsidiary to the bid item "Traffic Control".
