Location of Plant Site		9423 SW 165th, Augusta, KS			
No Bid		Bob Bergkamp Construction			

On the recommendation of Joseph Thomas , on behalf of Public Works, Jennifer Dombaugh moved to **accept the overall low bid from South West Butler Quarry for an initial purchase in the amount of \$180,000.00 and establish contract pricing for two (2) years with three (3) one (1) year options to renew.** Angela Caudillo seconded the motion. The motion passed unanimously.

The additional mileage and labor involved in picking up from Mid-States Materials, LLC (Mid-States) would mean additional pick-up cost of \$8.55/ton for their bid. Mid-States is 45 miles further to travel in each direction.

AB-3 Rock is used for making the edge of road pavements thus creating a rock shoulder edge. The bid from South West Butler Quarry represents a 9% price increase from the last contract established in 2015.

Angela Caudillo: Is the \$7.20 is that then a delivered price or is that the price of fuel calculation?

Joseph Thomas: The county is picking up the materials. This is just the material itself.

Angela Caudillo: There is fuel calculation in that to or is the additional \$8.55 the fuel calculation would've been for the other?

Lynn Packer: That's for us. Either way we would pick up.

Angela Caudillo: So they would charge you additional to pick up or is that your calculated fuel and travel expense?

Lynn Packer: That is our cost.

Kevin Stamper: Please go to the podium and state your name for the record.

Lynn Packer: The cost that we have is a pick-up cost from the actual location of the quarry for all cases. South West Butler Quarry being closer than Mid-States, less cost for us to pick up from them. So the overall projected cost of the contract was cheaper with South West.

Angela Caudillo: Okay, thank you.

Richard Powell: Is this product we're buying and with what we're using it for, is this part of the Public Works regular ongoing maintenance program?

Lynn Packer: Yes, we use it primarily for our shoulder, but we use in various fashions on a continual basis for all of our maintenance.

Richard Powell: On the very last line in our supporting information it says that the bid represented here represents a 9% increase over the last contract, which was some 4 years ago. Is that an acceptable figure?

Lynn Packer: Yes, aggregate across the board has increased.

Richard Powell: Do we have any other questions or discussion?

Angela Caudillo: Yes, with one quick question. With the options to renew are those then calculated with a specific increase per year or are they pre-calculated? Is that pre-negotiated?

Joseph Thomas: No, it's not. What we do at each year's renewal, we find out what that cost will be for the year. Generally we have a couple of years to hold it in place. That's why we leave these options in because we might choose not to go back out for
