The following is to ensure that vendors have complete information prior to submitting a proposal. Here are some clarifications regarding the proposal for **CM-K Crushed Limestone** for **Public Works**.

Questions and/or statements of clarification are in **bold** font, and answers to specific questions are **italicized**.

**Question:** How much of this CM-K material does the county typically stockpile at one time?

*Answer:* Stockpiling occurs at a rate of approximately 200-500 tons per day, Monday through Friday, until PO tonnage is received.

**Question:** Is there a minimum production (tons/day) the county is going to require from the vendor?

*Answer:* We prefer you haul 200-500 tons/day, possibly more if attainable.

**Question:** Paragraph E states the contractual period will be one year, with two (2) one (1) year options to renew. Is it the county’s intent to have this 5,000 tons of material delivered over the life of the contract, or is it their intent to have the material delivered continuously until all 5,000 tons of material is stockpiled?

*Answer:* The county intends to receive 5,000 in the first year, and will order unspecified amounts in years 2 and 3.

**Question:** Will the contract be “not to exceed” 5,000 tons, or is there potential to exceed that quantity over the life of the contract? If there is a chance to exceed this quantity, then can you provide a yearly average for how much of this material is used by the county?

*Answer:* There is a chance to exceed in any given year.
