INSTRUCTIONS: Please identify the top two needs in your judicial district and provide thorough and complete information regarding these needs. Aligning with K.S.A. 75-7044a(b), identified needs should focus on programs/services to reduce reliance on out-of-home placement and to reduce recidivism. Do not include programs/services already implemented in the district. Do not include programs/services funded through the new JCAB grant process or Reinvestment Grants. If information is incomplete, it will be omitted from the final report to the JOC. If no additional programs/services are currently needed, please leave blank.

A) Address service gaps, capacity and needs for street connected, homeless and transitional age youth. B) Services provided will be inclusive of youth advocacy and parent advocacy	A one stop conglomerate targeting street-connected youth focused on inclusion, reintegration, and harm-reduction strategies that serve children and young adults by decreasing barriers to address their most basic needs in order to allow immediate sustainability and long term success in the community.	At any given time, the number of street connected youth being served through juvenile field services can vary from 0 up to five. Other youth-serving agencies see similar fluid numbers. The commonality is the need for a collaborative effort to create a safe one stop location that youth who are street connected, homeless or transitional age can receive services and resources for successful transition to more sustainable living.	Data shows youth who are under supervision and experience homelessness do so out of situational issues. However, USD 259 has provided data that shows 1,440 homeless youth were provided services in the 19-20 school year. Street and Working Children: A Guide to Planning. London, England: Save the Children. West, Andrew. 2003. At the Margins: Street Children in Asia and the Pacific. Washington, D.C.: Asian Development Bank.	200-300	Children, adolescents, and young adults up to age 24 who are homeless, street connected or transition age in insecure living situations, unable to meet basic needs and having a fundamental lack of life skills with their most meaningful social connections being on the streets.	\$500,000.00	Cost inclusive of facility rental/mortgage, utilities, equipment, supplies, incentives (food, recreational items, self-care items, clothing), three full time & three part time staff.	Capacity: a focused effort on tracking numbers for this population will be made to confirm the annual capacity for this program. Anticipated ADP of 10.

Day Treatment Services	Provide evidenced based programming focused on identified needs and connecting youth to prevention and treatment programs existent in the community to create a continuum of programs focused on meeting the unique needs of this population.	Providing a location that youth can receive treatment services will result in the further reductions in serious criminal conduct throughout Sedgwick County.	The census of youth in out-of-home placement as of 7/31/20 showed 2 youth. The number of youth under supervision in Sedgwick County was at 171. These combined populations underscore the ultimate need for a day reporting program to adequately meet the complex needs of this population.	Washington State Institute on Public Policy rated effect coordination of services. Crime Solution Promising.	150-200	Moderate-High Risk Youth	\$9,356 per year	The cost for covers staff, equipment, and supplies to provide treatment services.
