ADDENDUM 2

RFB #21-0032

4500 CREW CAB 4WD DUAL REAR WHEEL TRUCK W/FLAT BED

May 13, 2021

The following is to ensure that vendors have complete information prior to submitting a proposal. Here are some clarifications regarding the bid for a 4500 Crew Cab 4WD Dual Rear Wheel Truck W/Flat Bed.

Questions and/or statements of clarification are in **bold** font, and answers to specific questions are *italicized*.

- 1. Our up fitter tells me that the controls for the compressor (VMAC stacked G30 gas driven air compressor) are integrated in the machine and cannot be removed and placed in the belly tool box as requested in the bid. The up fitter tells me that the controls can be separately located on a standard G30 VMAC Compressor. Would you want a quote with a standard G30 in order to have the controls separately located in the tool box?**

Answer: As long as the air compressor meets spec, where the switch box is located it is not a deal breaker. We would prefer down in the side box.

Firms interested in submitting a proposal must respond with complete information and **deliver on or before 1:45 pm** CDT, Tuesday, May 18, 2021. Late proposals will not be accepted and will not receive consideration for final award.

“PLEASE ACKNOWLEDGE RECEIPT OF THIS ADDENDUM ON THE PROPOSAL RESPONSE PAGE.”
