**Subject:** Lake Afton camping permits and handicapped areas

**Question or Comment:**

campers without handicapped stickers permitted to park in those areas. There is no sign of handicapped signs showing and no current paid stickers there. I know several elderly and handicapped people who aren't allowed to use the areas because some ablebodied person is there saving it for later. I suggest that the permit with a paid thru date MUST

be posted at each campsite. Some of the RVs look as tho they have been there since spring like they live there, What happened to the 14 day and have to move, not just go to the dump and back.

**Subject:** 21-27512 Consideration of Partnership Agreements

**Question or Comment:**

Commissioners,

I am very troubled to learn that Sedgwick County approved an \$8,412,384.00 for a contract period of ten years in April of 2020. I'm also concerned that most of the data I've linked below would have been available for the committee to review during the RFP process.

Sedgwick County is currently considering partnership agreements to utilize Tyler Technologies to manage, create, share, and maintain the sensitive and protected

information of Sedgwick County residents. Tyler technologies has a troubling history of disputes with local governments, inadvertent releases of information that could endanger someone's life or undermine investigations, and insufficient cybersecurity to protect their internal systems from ransomware attacks.

Tyler Technologies, Inc. has been fired and/or sued by governmental agencies in California, Missouri, Iowa, Colorado, and Texas for breaches of contract, misrepresenting its products, and failure to make good on its promises. It would be hard for the county to back out of a bad software choice when a hundred thousand dollars would have already been invested and contracts signed with local municipalities. Taxpayers would have to pay for change orders to avoid writing off the investment already made in the software, training, and staff time.

I urge you to strongly reconsider this agreement, and to pursue other avenues. Using private 3<sup>rd</sup> companies to manage Sedgwick County resident's data is a bad idea.

**Question or Comment:**

How is it me being a small business owner can not even get the Wichita police department to come out to an attempted burglary on my business and could not get them to come out for a hit and run when my bike was hit by a drunk driver but they can be out in force to confiscate and fine people celebrating the 4th we got 2 tickets 2 different times but they can't spend any extra time looking for criminals stealing and breaking into places if you all would patrol like you was on the fourth you might actually catch someone who deserves to get into trouble but all you have the time and extra police force to do is harrassment of good tax paying citizens of this county when can we see the patrol beefed up on crime and not family get togethers???????
