Subject:

Covid Bribery

Comment:

I have grave concerns about the current marketing Sedgwick County is using in regards to the Covid-19 vaccine.

If Sedgwick County is offering an incentive (bribe) to receive medical treatment will they be taking on the responsibility if someone is injured or dies from that treatment?

"Receive your first dose of the COVID-19 vaccine and choose an incentive.

- Only individuals receiving the first dose are eligible for incentives

- Incentives are valued between \$70-\$100

Receive your second, third, or booster dose and choose a COVID-themed limited t-shirt.

The first 25 people at each location will receive a \$3 Sedgwick County Zoo voucher."

I'm guessing Sedgwick County has Covid money they need to allocate, but I can think of 1001 ways to better spend this money. I'm certain everyone that "wanted" the vaccine/medical

treatment has gotten it by now. Are you aware that normally people get vaccines for medical reasons, but this is different. Research has shown over 50% of people got the vaccine for non-medical reasons, which is frightening to me and has never happened in our history. There is plenty of evidence that shows the vaccine doesn't stop transmission and 100,000's of people are having severe adverse reactions. So why do you continue to push the narrative- everyone should get it, it's safe & effective?

How about we spend some money on all the mental health issues covid has caused to Sedgwick County. This to me is much more important than continuing to push vaccines.

Thank you in advance for your response to my concerns,

Leann
