	Masters Transportation	Midway Motors of Hutchinson	Orr Nissan of Wichita, Inc.
	Rusty Eck Ford, Inc.		

On the recommendation of Britt Rosencutter, on behalf of Fleet Management and EMS, Tim Myers **moved to accept the bid from Sam Pack's Five Star Ford for the adjusted amount of \$128,472.47***. Anna Meyerhoff-Cole seconded the motion. The motion passed unanimously.

The EMS Operation Support Trucks are designed around a four (4) door/crew cab pick-up, with 4WD, and a solid fiberglass topper. These trucks are designed and laid out with medical equipment, medical supplies and medications in a formatted system, similar to the way each ambulance has their equipment arranged. This makes it easier for Paramedics and Emergency Medical Technicians (EMTs) to find what is needed on emergency calls.

The 4WD provides EMS the ability to maneuver as a first response vehicle in places an ambulance cannot navigate (rough terrain, non-road surfaces, high water, and snow). The 4WD also allows EMS to provide patient care and move patients from areas an ambulance can't respond to. This will be areas such as off road conditions, Mass Casualty Incidents (MCI), large accident scenes, and natural disasters.

The four (4) door cab truck is used as a first response vehicle and can transport EMS Technicians with sit down patients to an awaiting ambulance during MCIs and disasters. This also allows EMS to provide additional seating space for Paramedics/EMTs to be transported safely to EMS posts, hospitals, or disaster scenes.

The truck topper with slide out bed also provides a protected area for moving lay down patients to an awaiting ambulance during these same MCIs or large scale disasters. The truck topper also provides an area to secure our durable medical equipment and medical supplies.

The ¾ ton chassis and 4WD assists in pulling the ambulance out of road conditions they might get stuck in such as muddy roads, snow drifts, and icy road areas. It is also an essential asset in moving our Disaster Medical Support trailers in the event of a natural disaster or an MCI.

Notes:

Fleet evaluates all vehicles and equipment up for replacement before requesting bids.

<u>Vehicle #</u>	<u>Year</u>	<u>Make & Model</u>	<u>VIN #</u>	<u>Points</u>	<u>Mileage</u>
2501	2009	Chevrolet Suburban	1GNGK46K59R127500	20	212,815
Cost to keep it in service over its life (not including scheduled maintenance) \$59,343.58.					
90% vehicle availability over the last 12 months.					
2502	2009	Chevrolet Suburban	1GNGK46K69R187690	19.8	143,584
Cost to keep it in service over its life (not including scheduled maintenance) \$33,251.50.					
66.1% Vehicle availability over the last 12 months.					

*The quoted price was adjusted down due to additions made by the dealer that were beyond our specifications. We asked them to remove the following:

1. Ultimate trailer tow package - Not needed by EMS
2. Chrome Package - Not needed by EMS

These are replacement vehicles. Surplus will be sold on Purple Wave.

Questions and Answers

Brandi Baily: The adjusted price is \$128,472.47 but the extended price was \$134,872.46 and there was an asterisk. I don't see the rest of the information.

Britt Rosencutter: It looks like part of the notes were cut off. The dealership bid was beyond our specifications. There were two (2) things that EMS didn't need on it. One (1) was the ultimate trailer tow package, which is the automatic backing up system, and the other is the chrome package which is kind of an aesthetics item and it really wasn't important. By removing those things that they added that were above our specifications, we were able to bring the price down a little bit.

Brandi Baily: This says FUNDING -- 2022 FORD F250 V8 CREW CAB W/TOPPER & BE. What does the BE stand for?

Britt Rosencutter: It stands for *bed*. The description field for the funding source has limited character space in the shopping cart and part of the word was cut off.

Brandi Baily: Does this pricing include the adding of the lights and the radio that need to go in there or is that separate?

Paul Gibson: The lighting package and all that will be priced out separate. Fleet Management pays for that and then in turn EMS pays for it out of our budget.
