1. SS-1H OIL -- PUBLIC WORKS

FUNDING -- PUBLIC WORKS

(Request sent to 38 vendors)

RFB #22-0053 Contract

			Ergon Asphalt & Emulsions, Inc.		
			Quantity	Price Per Gallon	TOTAL
Emulsified Oil, SS-1H Per KDOT Standard Specifications, 2015 Edition, Division 1200, Section 1203, Emulsified Asphalt, Table 1203-1. Price per gallon (FOB plant site) Sedgwick County will haul.			12,000	\$2.65	\$31,800.00
Location of Plant Site			Eldorado, KS		
Ready for pickup calendar days			Monday through Friday		
No Bid			Wildcat Construction Co., Inc.		

On the recommendation of Lee Barrier, on behalf of Public Works, Tim Meyers **moved to accept the bid from Ergon Asphalt & Emulsions, Inc. for the initial purchase of \$31,800.00 and for a contract period of one (1) year with two (2) one (1) year options to renew.** Jennifer Blasi seconded the motion. The motion passed unanimously.

SS-1H is a polymer emulsified oil used to complete the paving, repaving or patching of asphalt roadways. The increased usage in 2022 is due to the implementation of an asphalt paver recently added to the Public Works Fleet. Prior to the paver program previous year usage was 2,821 gallons or \$5,641.00.

Questions and Answers

Tim Myers: Have we used Ergon Asphalt & Emulsions, Inc. previously?

Lynn Packer: Yes, we have used Ergon. In fact, they have been the primary supplier of our emulsifiers for a number of years now.

Tim Myers: Thank you.

Brandi Baily: Previous year usage was 2,821 gallons and I know you said the increase is due to the implementation of an asphalt paver recently added. Approximately how many miles do you anticipate completing this year that is adding to this increase?

Lynn Packer: Right now we are estimating about nine (9) miles of two (2) lane highway will be used for the paver in addition to our normal uses of that emulsification, which is when we do a pothole repair or any other minor fix on our road, we also use this as well. It's basically after you clean the area it provides a tack to be able to bond this new asphalt with the existing asphalt that is already there.

Brandi Baily: Where did we get it before? Who did we use prior?

Lynn Packer: I actually don't remember the previous vendor. We have used Ergon pretty much exclusively in my 20 years. I know there have been others but Ergon is the closest and are located in El Dorado. They typically get the bid because of transportation costs involved and our ability to go up and get it. Last year it was about \$2.00 per gallon. This year it is \$2.65. Frankly I am very pleased with the unit price given everything being as volatile as it is with the oil industry.

Brandi Baily: I guess what I should've asked is are they our current vendor?

Lynn Packer: That is correct.
