

**COVID-19 Metrics: Sedgwick County Residents  
March 15 2020 through Aug 6, 2022**

*This table is published on Mondays.*

*Blue columns are historical data points. Additional historical data points and other metrics are available as graphs on the Sedgwick County COVID-19 StoryMap at <https://www.sedgwickcounty.org/covid-19/data/>.*

*Because numbers are reported by test day and tests are sent to SCHD from different days, numbers can change from report to report. Most change occurs in the two most recent weeks.*

*Deaths are reported by the date the patient died.*

As of Aug 6, 2022:

- Most Sedgwick County COVID-19 metric trends are stable.

\*Due to lag in reporting, positive tests and COVID-19 deaths from these weeks were added on 8/8/22.

\*\*Vaccination data is reported as cumulative instead of weekly. Percent of residents who received a 3<sup>rd</sup> dose (immunocompromised) and booster are combined based on data received from the Kansas Department of Health and Environment.

\*\*\*Vaccination data lags compared to case data, so is not available for the most recent full week.

\*\*\*\*Fully vaccinated: COVID-19 vaccine was first available to select populations starting in December of 2020. Availability expanded to everyone 16+ in April of 2021. 12+ vaccines were available starting in November 2021. 5+ vaccines were available starting June of 2022.

3rd/Boosters: 3rd doses and/or boosters first became available in August of 2021. Boosters expanded to all adults 18+ in November of 2021. Availability expanded to 12+ in January of 2022.
