## WHAT IS UNIVERSAL HOME VISITING?

Universal Home Visiting is an educational home visitation program that provides prenatal and postpartum support to caregivers and their families in Sedgwick County with no out of pocket expense to participants. Registered nurses and community liaisons provide education and family support through home and office visits.

## HOW DOES IT WORK?

Primary caregivers enrolled in the program will receive at least one prenatal and postpartum visit. On average, these visits take about an hour.

- The prenatal visit includes valuable education about preparing for a baby, including health and safety information. Time is set aside for questions.
- On the “Welcome Home” postpartum check, a registered nurse will check on the new baby’s vitals and wellness and provide information on infant development and preventive programs.

Universal Home Visiting services have been shown to increase the likelihood of access to early and comprehensive services before, during, and after pregnancy.
