1. LABORATORY AND SAFETY SUPPLIES -- VARIOUS DEPARTMENTS
FUNDING - VARIOUS DEPARTMENTS

(Joint Governmental Purchase - State of Kansas Contract #55510)

#24-2055 Contract

	Fisher Scientific Company, LLC
Laboratory and Safety Supplies	Pricing listed on above State of Kansas Contract

On the recommendation of Britt Rosencutter, on behalf of various departments, Greg Gann moved to **utilize the State of Kansas Contract #55510 with Fisher Scientific Company, LLC good through December 31, 2028**. Brandi Baily seconded the motion. The motion passed unanimously.

The Regional Forensic Science Center (RFSC) in their efforts to support molecular genetic analysis (DNA profiling) purchase consumables including supplies and reagents that are required to operate analytical instrumentation and repair/preventative maintenance agreements for critical instrumentation used in the DNA typing process. It also includes the proprietary chemistry kits that have been developed and validated in accordance with the Federal Bureau of Investigation Quality Assurance Standards (FBIQAS), the Scientific Working Group for DNA Analysis Methods (SWGDM), and the Validation Guidelines for Forensic DNA Analysis Methods. Compliance with these standards is essential for maintaining laboratory accreditation.

One of the larger expenses incurred by the DNA section is the chemistry required to develop DNA profiles. In particular, the Globalfiler™ kit is used to develop DNA profiles from crime scene samples, as well as from victims/suspects. The profiles can then be compared and a determination made about who may (or may not) have deposited biological material at a crime scene. The State of Kansas contract pricing is not limited to items purchased for DNA testing; thus, all forensic laboratory sections will be eligible for contract pricing for required supplies.

Notes:

The annual spend for 2022 was Fisher Scientific - \$43,105.54 and LifeTech - \$137,811.00 = \$180,916.54.

The annual spend for 2023 was Fisher Scientific - \$97,188.31 and LifeTech - \$94,759.52 = \$191,947.83.

Special Discount	-\$63,414.00
Estimated Freight Charge	\$3,000.00
Total	\$125,221.00

On the recommendation of Britt Rosencutter, on behalf of the Regional Forensic Science Center, Tim Myers moved to **accept the quote from Agilent Technologies in the amount of \$125,221.00**. Greg Gann seconded the motion. The motion passed unanimously.

The GC-MS system is an essential tool for modern analysis of pharmaceuticals including screening for basic drugs and drug metabolites. The RFSC received Centers for Disease Control (CDC) Overdose Data to Action (OD2A) grant funding to expedite real-time drug analysis and to assist with modernization of drug testing instrumentation.

This instrumentation is used for the positive identification of illicit drugs and is the key instrumentation needed to process the 1000+ backlogged cases awaiting testing due to the fentanyl crisis. This will assist in the prosecution of cases and prevent distribution of dangerous and deadly drugs in the region.

This new GC-MS system will be an updated model of the current system that the laboratory is utilizing. The new system requires the same consumables which are currently being purchased by the laboratory. All methods analyzed by the current systems can be moved to the new system since they utilize the same software. All qualified forensic scientists are trained on these systems and software which will expedite method validation on the new system and reduce the impact on turnaround time for ongoing casework analysis.

These are replacement vehicles. Surplus will be sold at auction.

Questions and Answers

Greg Gann: I see that a lot of the mileage of the vehicles being replaced is quite high. Is that just an excellent use of the vehicles, getting as much value out of them as we can?

Beau Bergeron: Yeah. I mean they're all over 14 years old. Usually we try to replace them at 10 years but due to shortages on everything else, we're behind. Some of them have lower miles but higher points. Because they're problematic, we spend a lot of money trying to keep them going.

These are replacement vehicles. Surplus will be sold via auction.

Questions and Answers

Brandi Baily: We're replacing Chevy Impalas to a minivan. Is there a reason we're going to a bigger vehicle?

Beau Bergeron: They do not make prisoner partitions for sedans anymore. There's like two (2) models that do and they are way out of our price range, and for the amount that they go for, minivans are much easier than small sedans.

Russell Leeds: Again, these appear to be about 15 years old and high mileage and had lots of wear and tear.

These are replacement vehicles. Surplus will be sold via auction.

Questions and Answers

Russell Leeds: I know that the Sheriff and Fleet have already vetted this, but I assume if we're moving CSI from vans to cars, that we know that they can carry the equipment they need to do their job and comfortable doing this. Right?

Beau Bergeron: Yes.
