On the recommendation of Lee Barrier, on behalf of the Division of Information Technology, Anna Meyerhoff-Cole moved to **accept the quote from iLOOKABOUT US Inc. dba APEX Software in the amount of \$57,175.00.** Philip Davolt seconded the motion. The motion passed unanimously.

Apex Sketch sketching software is used in conjunction with the state mandated Computer Assisted Mass Appraisal (CAMA) system, Orion. This software allows the Appraiser's Office to sketch outlines of every improvement in the county to accurately obtain square footage.

Apex Sketch allows for angles, curves, turrets, other odd shapes, and calculates an exact area of said improvements. If the Appraiser's Office did not have this software, they would attempt to sketch with the sketching package that is part of the Orion software but it does not allow for angles, curves, turrets, or other odd shapes, causing the calculation of square footage to be manually calculated and resulting in errors. In addition, sketches would not be viewable to the public on the Appraiser's website as it would not be part of the property record card.

Apex Sketch has been in use since 2008 and continues to be an important tool utilized by the Appraiser's Office.

Questions and Answers

Philip Davolt: I guess I'm curious about this Greater Kansas City School District and how it benefits us.

Lee Barrier: It's what we call a Joint Governmental Purchase. When we have cooperative agreements like that, it enables Purchasing to go in and piggyback off of those contracts. Since there is a collective, they've been able to give us better discounted rates and we're able to take advantage of that.

Russell Leeds: So it was a competitive process through that?

Lee Barrier: Yes. The due diligence was done on the contract.
