What are Mental Health Intervention Teams?

The MHIT program is dedicated to improving each of its student's overall academic potential by providing comprehensive mental health services in schools.

Connecting mental health providers (MHPs) to our schools

Under MHIT, the school district employs SCHOOL-BASED LIAISONS (SBLs), who identify students needing intense behavioral & and mental health services, and links them to local service providers.

Customized school and behavioral health services

Each of MHIT's school districts is UNIQUE, and they CUSTOMIZE their program to fit the needs of their students, families, and community.

Prioritizing our students' mental health needs

This program is INNOVATIVE, PREVENTATIVE, and it improves the lives of our most precious resources... OUR CHILDREN!

Funding made possible through Kansas Department for Aging and Disability Services
