## Overview

The Division of Information Technology (IT) delivers a diverse set of services ranging from answering phone calls and E-mails from employees with questions regarding software use through Helpdesk, to developing applications that streamline public services processes. IT supports all enterprise-wide technology solutions including phones, networks, databases, Geographic Information Systems (GIS), and Enterprise Resource Planning (ERP) systems and data warehousing. IT provides a centralized technology helpdesk, document imaging services, application and project management services, internet services, and IT consulting. The Division aligns itself to County priorities to ensure they apply technologies prudently to improve internal and external outcomes, including reducing costs and risks of technology related assets.

## Strategic Goals:

- Foster an environment of continuous learning to support a highly evolving business environment
- Provide stable, secure, and scalable infrastructure that improves operations, security, and reliability through shared services and reputable external service providers
- Partner with all departments to understand business needs and provide innovative solutions, leveraging existing and/or emerging technologies where appropriate

## Highlights

- In November 2025, the County went live with a cloud version of Systems, Applications, and Products (SAP) core financial system and purchasing software. IT is now running S/4 Hana Cloud and Ariba which are "go forward" SAP solutions
- IT completed their Microsoft Office 365 implementation.
- This software suite provides collaboration tools for end users and simplifies software distribution
- IT implemented a program that better aligns IT and County departments through the process of building a multi-year technology roadmap based on their needs

# Accomplishments and Strategic Results

## Accomplishments

IT implemented the latest employee “on-boarding” functionality within the SAP Human Resources (HR) (i.e., SuccessFactors) environment.

The Division improved parcel maintenance software, saving money and modernizing processes. IT modernized their Public Works GIS environment by migrating to a centralized GIS platform based on a single authoritative map repository.

IT provided several internally developed web enhancements for their citizens and partners. Antique vehicle owners can now pay for their tag renewals online. Citizens can now see County Clerk transfer record information and perform searches against basic medical examiner death record information from the Regional Forensic Science Center (RFSC).

The Division partnered with the City of Wichita to improve visibility to public safety information.

## Strategic Results

IT has several strategic goals involving employee deployment, platform stability, partnerships, and financial funding. The Division’s platform stability goal focuses on improving operations, security, and reliability. IT’s goal for customer services is to resolve all non-project related Helpdesk tickets in less than five days and, in 2025, these tickets were resolved in 2.6 days on average. In addition, IT aims to receive an average customer satisfaction score greater than a “3.0” (on a scale of 0.0 to 5.0), and they achieved a score of 4.7 on average in 2025. Finally, IT aims to achieve system uptime of 99.0 percent and 99.0 percent for application availability and, for 2025, they achieved 99.6 percent and 99.6 percent respectively.

## Significant Budget Adjustments

Significant adjustments to the Division of Information Technology’s 2027 Recommended Budget include an increase in contractals due to software maintenance cost increases (\$1,493,604), an increase in funding for ongoing Technology Review Board (TRB) projects (\$690,551), an increase in funding for 2027 TRB projects compared to 2026 TRB projects (\$398,789), an increase in charges for services revenue to bring in-line with anticipated actuals (\$368,431), a decrease in capital equipment to bring in-line with anticipated actuals (\$253,216), an increase in revenue and expenditures due to 2027 grant funding (\$250,000), an increase in personnel due to the addition of 1.0 full-time equivalent (FTE) IT Project Manager position (\$108,348), an increase in personnel due to shifting 0.5 FTE Video Surveillance position to 1.0 FTE (\$69,831), an increase in interfund transfers due to a 2027 grant match (\$50,000), and a decrease in expenditures due to the elimination of certain licenses and subscriptions (\$2,633).

### • Project Management

Project Management plans, performs, and directs concurrent IT projects and related activities for Sedgwick County. They coordinate the work of technical/professional teams responsible for the definition, design, development, and implementation of IT business solutions and small to large IT related projects in diverse functional areas of one or more assigned County departments. IT Project Managers are directly responsible for projects from the time requests for services are received until the needed support is delivered.

### • Application Management

Application Management performs the function of managing application software, maintenance, versioning, and upgrades (whether purchased or built in-house) through an application's entire lifecycle. Application Management is an enterprise-wide approach geared to providing optimal application performance benchmarks while incorporating business processes and IT methodologies. Key service areas within Application Management are the tax system, document management, and public safety system support.

### • IT/Application Development

IT/Application Development customizes, enriches, and maintains the software environments used by County departments and partners to ensure the needed functionality is safe, secure, and available. Database Services manages hundreds of unique databases ensuring departments have access to critical data around the clock. Internet Services provides internet, intranet, and extranet application management and site hosting for Sedgwick County. It supports the County internet site ([www.sedgwickcounty.org](http://www.sedgwickcounty.org)) where 24 applications are provided so citizens can access various e-government services which enable them to do County business anytime without having to call or travel downtown. In 2025, over 19.2 million visits were made to the County's website

### • Helpdesk

The Helpdesk is the County's first place to call or email for help with technology questions and problems, and it works to resolve issues quickly or route them to the right team. Customer Support Analysts provide in-person assistance through a service request system, helping departments set up and maintain computers and related equipment, fix problems, and complete planned upgrades. The team also advises departments on choosing technology that best supports their work and improves service to the public. This work supports the County's goals for a well-trained workforce, including expanded Artificial Intelligence (AI) focused training for IT staff. It also helps maintain reliable and secure systems by supporting high availability for key applications and strengthening cybersecurity awareness. Through ongoing partnership with departments, the team helps develop technology plans and improves satisfaction with the County's technology and customer service.

### • System Administration, Networking, and Telecommunications

System Administration, Networking, and Telecommunications manage the County's core technology infrastructure that supports daily operations, including the systems employees rely on to do their work and serve the public. System Administration maintains the server and shared computing platforms that run critical business applications and protect County information. Networking provides secure connectivity between County locations and systems, helping ensure reliable access to services and supporting electronic security functions. Telecommunications supports County communication services—such as phones, voicemail, messaging, faxing, and call center operations—so staff can communicate effectively with residents and each other. Together, these teams help keep County technology reliable, secure, and responsive to changing departmental needs.

### • IT Security

The IT Security team preserves and enables public services throughout Sedgwick County by vigilantly protecting the confidentiality, integrity, and availability of critical infrastructure, data, and applications from cyber threats. Through implementing global cybersecurity best practices, the team minimizes the risk of service disruptions, loss of data privacy, and financial losses. The processes and security systems maintained also ensure compliance with critical regulations such as Health Insurance Portability and Accountability Act (HIPAA), Payment Card Industry (PCI), and Criminal Justice Information Services (CJIS).

### • Enterprise Resource Planning

The mission of Enterprise Resource Planning (ERP) is to improve governmental transaction processes and decision making. ERP staff refines and automates operations, applies software patches, and implements major upgrades. ERP manages and supports all financial and Human Resource processes including budgeting, payroll, operational reporting, recruitment and career site, onboarding, employee training and development, employee performance and evaluation, and supply chain management. ERP also manages and supports data warehousing and business analytics that are used to integrate systems across the organization and supply visual statistics to make data-driven decisions.

### • Business Solutions Services

This program was incorporated into Application Management and IT/Application Development in 2023. Business Solutions Services provided assistance to departments that needed customized technologies to meet service demands and maximize benefits. It assisted in all aspects of acquiring and deploying new technologies, addressed all questions and issues from inception through go-live, and ensured that the technology met the client's needs. The program customized, enriched, and maintained the software environments used by County staff to ensure the needed functionality was available.

### • Subscriber Access

This program was incorporated into the Director's Office in 2023. The Subscriber Access Network provided citizens, as well as public and private organizations, with electronic access to Sedgwick County's public records on a subscription basis. What subscribers paid for was access, not information. That is, instead of calling a County office or coming to the Courthouse and using one of the public access computers, subscribers used County applications from any internet capable remote computer. Although a significant amount of information is already available for free through the County website, subscribers obtained up-to-the-minute information and details not available on the website. The information available was primarily related to the court system and taxes.

### • State & Local Cybersecurity Grant(SLCGP)

In 2022, the Department of Homeland Security established the State and Local Cybersecurity Grant Program (SLCGP) to help local governments reduce cyber risk. Sedgwick County received SLCGP funding to advance priority security capabilities, strengthening the County's overall cybersecurity posture. IT seeks to add value by leveraging grants aligned with their cybersecurity strategy, supporting improvements to enhance governance, asset visibility, risk-based prioritization, secure configuration, timely patching, and incident readiness, lowering the likelihood of compromise.
